

# L03: Your own story with ArcGIS and R

## Things we cover in this session

In this session, we will discuss some basic statistical tests and methods which help you to extract information from your data.

## Things you need for this session

- [W03-1: Your own story](#)

## Things to take home from this session

At the end of this session you should be able to

- do some advanced analysis of your (biodiversity) data sets using R
- predict some biodiversity indicators using environmental variables
- basically handle remote sensing data sets
- publish your own story using ArcGIS story maps
